PROFESSIONAL SUMMARY

Dedicated and detail-oriented Software Developer with proven hands-on experience in designing, developing, and maintaining robust software solutions. Skilled in a wide range of technologies including PHP, HTML, CSS, JavaScript, Python, Git, C#, ASP.NET, SQL, MySQL, and Microsoft SQL Server. Adept at working collaboratively with cross-functional teams to deliver scalable, secure, and maintainable applications that meet business objectives. Known for strong problem-solving abilities, a passion to contribute to innovative projects and drive technical excellence.

TECHNICAL SKILLS

- PHP, JavaScript, C++, Python, C#
- HTML, CSS, JSON, Git
- ASP.NET MVC, ASP.NET Core
- Database Programming Using Oracle Products (SQL, PL/SQL)
- Other databases MySQL, SQL Server
- Linux (Ubuntu)
- Using IDEs like Embarcadero Builder and Visual Studio Database design and optimization
- Microsoft Office (Word, Excel, Power Point, Access)
- Strong problem-solving and analytical skills.
- Strong work ethics and team player

EXPERIENCE

South African Music Performance Right Association (SAMPRA)

Software Development Intern

October 2023 – December 2024

- Developed and maintained applications using C# (.NET Core), HTML, JavaScript, CSS, JSON and Git, ensuring responsiveness and cross-browser compatibility.

- Contributed to the development of software systems pertinent to ongoing project initiatives.
- Collaborated on projects utilizing a variety of technologies and tools such as MS SQL/Oracle, MS SQL Server, Visual Studio and GitHub.
- Implemented user authentication and authorization features in ASP.NET-based systems.
- Contributed to the development of ASP.NET Core web APIs to support frontend requirements and third-party integrations.
- Performed thorough testing of the systems, including unit testing, integration testing, and debugging to ensure reliability and performance.

Makwa-IT

Software Development Intern

September 2022 – August 2023

- Developed systems using PHP, HTML, CSS, JavaScript and MySQL database.
- Built and maintained a system utilizing C# (.NET Core), HTML, JavaScript, CSS, JSON and Git, with a strong emphasis on responsive design and cross-browser functionality.
- Contributed to the development of software applications aligned with ongoing project initiatives, with a focus on API design principles and building RESTful APIs.
- Designed and maintained SQL Server databases for storing and retrieving application data efficiently.
- Deployed and performed thorough testing of the systems, including unit testing, integration testing, and debugging to ensure reliability and performance.
- Maintained developed systems to make sure they are user-friendly and produced comprehensive reports detailing project progress.

EDUCATION

National Diploma IT: Software Development

Tshwane University of Technology

Year: 2023

National Senior Certificate / Grade 12

Sicelimfundo Combined School

Year: 2016

PROJECTS

Asset Management System

A software system developed to help the organization effectively manage its physical and digital assets. Technologies used, Backend: ASP.NET Core MVC and Web API, Frontend: Razor pages and JavaScript frameworks, Database: SQL Server, Deployment: Cloud-based (Azure).

Recruitment Management System

Software system developed to streamline and automate the recruitment and hiring processes within an organization. It assists HR team and recruiters in managing candidate applications. Key features included: Secure and accessible recruiting platform, intuitive user interface and Implementation of software development processes and tools. Built this system using PHP, HTML, JavaScript and MySQL for database.

MIT Leave Management System

A software system developed to simplify and automate the process of managing employee leave requests and approvals within an organization. Key features included: Secure and accessible leave management platform. Technologies used: PHP, HTML, CSS, JavaScript. Implementation of software development processes and tools.

Peer-To-Peer Lending System

Final year project for Development Software IIIB. It is a form of financial technology that allows people to lend or borrow money from one another without going through a bank.
